3700

Your location may not serve 24/7, but that doesn't mean your customers can't have access to cash. The Tidel EasyPoint 3700 ATM was designed to provide financial institutions and retailers the convenience of 24-hour access to cash in a secure and affordable platform. This fully-weatherized ATM has been certified under UL 291 for outdoor deployment and conforms to all current and proposed ADA specifications. Security features include a Visa Encrypting PIN Pad (VEPP) with 3DES and the option to upgrade to UL 291 Level 1 vaults.

The 3700's rear-loaded dispenser provides ample note capacity and room to grow in the future (up to 4 cassettes). Other features include a stainless steel surround, a 10.4-inch color LCD display, metalized keypad, multi-position rear maintenance touchscreen control, and both TCP/IP and dial-up communications.

3700d

NCR EasyPoint has partnered with industry-leading kiosk surround providers to offer the 3700d. This low-profile ATM design meets the need that many financial institutions require for having an island ATM bunker that does not obstruct their view of the patrons using it. Combined with the standard features of the base 3700 with the addition of an internal heater/fan for environmental control and a high-bright display for better outdoor visibility, this platform provides a complete solution for drive-up cash access.
